

Town hall – yes, need engineering analysis on town hall roof capacity.
MA REC – less than SREC + fed payment of 30%
Panels 80-85% after 20 years can last a lot longer
Different company on school – solex solar

Recommendation:

MVP grant for elementary solar, 3 phase on Hathaway, and solar on highway and landfill.

ARPA for town hall solar, \$49K from ARPA no borrowing.
Weatherization, mini-splits apply for green communities \$.

Town financing for public safety solar panels

Plan A: include all projects in MVP grant

Plan B: use ARPA as backup for solar on town hall + engineering analysis

Warrant article for \$116,900 for public safety borrowing + engineering analysis

Need for MVP:

Cost estimate for design/engineering/specs/site plan permitting on all 3 buildings use 10% of total cost.

Cost estimate for 3 phase on Hathaway rd.

Cost for ground solar at elementary school and landfill

Notes prepared by Scott Stanton
